KEPT A PRISONER.

Peculiar Plight of a Preacher in New York.

AFRAID TO LEAVE HIS HOME Relics Found in the Ten Thomasud Islands of the West Coast.

Lest He be Barred Out - Door Guarded by a Young Man who Keeps It Looked. Queer Phase of Litigation Over Church Property-Pastor in a State of Stege.

NEW YORK, Jan. 7.-The extraordimary fact of a prominent Baptist clergy-man being held prisoner in his own house was stated in a sworn affidavit by the Rev. Daniel C. Potter, pastor of the Tabernacle Baptist church, to Judge Beekman, in the supreme court. Mr. Potter had a case on the calendar, and this was the excuse he sent for his non-

this was the excuse he sent for his non-appearance.

There was a strange condition of afrairs in and about Dr. Potter's residence. By the instructions of Lawyer Edward S. Clinch, a muscular young man, dressed in jeans and a blue shirt, keeps the door locked. It requires some argument to get in, and a great deal more to get out. Dr. Potter is taking life as easily as the circumstances will permit.

"No." he said to a reporter for the Morning Advertiser, who called on him petterday, "I did not go down town this morning to court, and you can probably see the reason. I sent word to Justice Bieckman that I was practically a prisoner in my own house; that if I went out I would not be able to return, and that all my papers and property would be at the mercy of my enemies, the Baptist City Mission Society. It was the direist trick ever, conceived by a white man, that of trying to get me to appear in Justice Beckman's court."

The suit in the supreme court was in the matter of \$51,000 of Northern Pablic to per garden at No. 169 Second avenue. The bonds have not been paying any interest for several years.

t been paying any interest for

ral years. This is the cause of all my trouble, This is the cause of all by bother said Dr. Potter. "If these bonds had paid interest I would be able to pay my bills. The lease was transferred to a party named by Mr. Rockefeller, who afterward failed. Now I believe he owns the property and controls the lease. The bonds were to have paid interest for not become due so long as the pro-remains with the Buptist Taber

nacle.
"Oh, I suppose I shall leave here when I have been told to do so by a court, not before. The only notice I have received so far is the order of a keeper to 'get

tion covered also by the latter in land mounds, for which archaelogists have not heretofore accounted. He believes that in their passage northward the lost race gave rise to or greatly influenced the more perfected civilization of the Central Americans.

Upon his recent arrival in Washington Mr. Cushing gave the writer a word picture of this newly excavated kingdom as it doubtiessly appeared in the activity of life. Such information as he has hithertomade public has consisted of descriptions of the dead ruins and the remains of the inhabitants. In this interview, however, the explorer may be said to have taken the writer with him as his first companion on a supposed journey to that mysterious old kingdom in the sea. Mr. Cushing's deductions are made after studying the abundant symbolic figures on pottery, wood, shells and many other objects found in the ruins, and after examining many interment places of the

gineering, architecture and workman ship represented in their buried institu-

ship represented in their buried institutions.

"These old people of the reefs and keys,
especially the men, were large in physique," said Mr. Cushing. "They were
correspondingly strong and active. By
their constant habits of canoe travel
their shoulders were extraordinarily
broadened and their arms perfectly developed. Their features were remarkably regular, those of the men especially,
the women being smaller, rounder and
flatter of face. The former had very
strikingly aquiline features, faces
square, full though narrow, eyes, and
chins unusually well developed for those
of primitive people. They were longheaded, with forheads high, but sloping.
Their complexion was dark olive, inclined to ruddiness. Their hair was
black and measurably straight. The
whole appearance was very Egyptian-

y day like mushrooms; but the

so far is the order of a keeper to 'get out'.

"This is a fine state of affairs, to be sure." continued the clergyman holls. "I sent Lawyer Clinch a letter complaining of the outrageous course of the keeper, and he sent me a letter threatening me with contempt proceedings if I did not vacate. Then the keeper locks the building every night and closes up the fire escape, so that we are in a vertable death trap. If a fire broke out it would be by God's providence that we escaped. Then they tell me if I so out they will keep me out. Yesterday they refused admittance to a physician. They have so far admitted the grocer and butcher, but I don't know when they will stop them from coming here. Go to John D. Rockefeller and tell him that he does not dare deny a word of any statement I have made."

eepy toeeper to hear the banging at the sor when the reporter wanted to leave. "Oh, that's all right," he replied, when remonstrance was flung at him. "I m here by Mr. Clinch's orders. If I on't keep the door locked some other loke will. One got fired last week for a doing it.

fair."

In the meantime Mr. Potter remains in his study on the second floor of the church house smoking Turkish eigarettes, his feet incased in an easy pair of slippers, preparing another fulmination against Mr. Rockefeller for next Sunday.

OUR WHEELING BREWERIES

Show Nothing to Compare with this

Can Show Nothing to Compare with this in Their Cellars.

SAN FRANCISCO, Jan. 7.—The largest oak wine vat in the world is being set up by the California Wine Association at the Lachman cellar on Brannan street, in this city. The famous Heldelberg cask is a baby by the side of the new alogside and around them they shut out the waves and built the islands, which have hitherto been thought to be natural formations. The walls were solidly built of conch shells, interlocked, laid upon the bare reef, covered with shells of oysters and clams thoroughly pace 1 down, when needful faced also with conchs. Inside the long ridges were canals which led into the graded ways, ascending to the mounds. The citizens were enconomical of the space thus made. They could not afford the cask is a baby by the side of the new one, which has the proportions of a twostory cottage and on the bottom of
which four quadrille sets could dance
with ease. The Heidelberg wonder had
a capacity of 50,000 gallons, while the
Nan Francisco monater is to hold \$0,000
gallons of the juice of the graps.
The huge cask is aval on the ground,
and measures 275-2830 feer in each direction of the property of the cash is the county of the cash is a set of the cash of t

with conchs. Inside the long proges gallons of the julice of the graph.

The huse cask is oval on the ground, and measures 27/x20 feet in each direction, while the great staves rise to a neight of 20 test and are from 2½ to 3 inches in thickness. The wood used will weigh 20 tons, and the iron hoops which encircle the staves would turn the scales at six tons or over.

It is estimated that the tank and it contents will weigh 400 tons, and to sustain this great weight timbers 18x16 inches and measuring 8,000 feet, have been used as a foundation upon alphal and earth. The cover will be of redwood, as it is less likely to warp under the action of the sun passing through a sky light than the other wood. Oak is used for the bottom and sides, as it is best adapted for the aging of wines.

Next to this, the greatest of oak wine tanks, comes one at Toledo. O., which holds 24,000 gallons. There are others in this state of 25,000 or 30,000 gallons capacity, and if there has have the california Wine Association, the contents of nominal quart size to fold.

Natural Gas a Mineral.

NEW YORK, Jan. 7.—Judges Lacombe and Wallace, of the United Buates circuit court of angeals, in a decision fleet to-day, classify natural gas as a mineral capacity from the purposes of the state finding of the circuit court of the purposes of the state finding of the circuit court of the purposes of the state finding of the circuit court of the purposes of the state finding of the circuit court of the purposes of the state finding of the circuit court of the purposes of the state finding of the circuit court of the purposes of the state finding of the circuit court of the purposes of the state finding of the circuit court of the purposes of the state finding of the circuit court of the purposes of the state finding of the circuit court of the purpose of the state finding of the circuit court of the state finding of the circu no liniment on earth like it. I had the rheumatism for several months and could get no relief until I used Salvation Oil, two bottles of which effected a cure, and I feel as well as ever. No home should be without it." Dyspepsia Tablets.

DOWNED BY A GIRL

Interesting Experience of an Indianapo-lis Gentleman. FDORIDA'S EXTINCT BACE.

No trouble is more common or more misunderstood than nervous dyspepsia. misunderstood than nervous dyspepsa. People having it think that their nerves are to blame and are surprised that they are not cured by nerve medicine and spring remedies; the real seat of the mischief is lost sight of, the stomach is the organ to be looked after.

Nervous dyspepties often do not have any pals whatever in the stomach some perhaps any of the usual symptoms of stomach weakness. Nervous dyspepsia shows itself not in the stomach so much as in nearly every other organ; in some cases the heart palpitates, and is irregular; in others the kidneys are affected; in others the bowels are constipated with beadaches; still others are troubled with loss of flesh and appetite, with accumulation of gas, sour risings and heartburn.

Mr. A. W. Sharper, of No. 61 Prospect Street, Indianapolis, Ind. writes as follows: "A motive of pure gratitude prompts me to write these few lines regarding the new and valuable medicine. Stuart's Dyspepsia Tablets. I have been a sufferer from pervous dyspepsia for the last four years; have used various patent medicines and other minedles without any favorable result. They sometimes gave temporary relief until the effects of the medicine relief until the effects of the medicine relief until the effects of the medicine New York Dispatch: Since the excava-tions of Pomeli and Troy there has been People having it think that their nerves acologival find than that from which acologival find than that from which, Frank Hamilton Cushing, the well known and successful explorer from the bureau of ethnology, Washington, and the University of Pennsylvania, has just returned. He has discovered in the "Ten Thousand Islanda"—whose myridads of small forest-covered reefs off the inner or gulf coast of Florida—vast ruins which indicate the long past existence of hundreds of worderful cities, once the kingdom of a race now lost—a race whose

which indicate the long past existence of hundreds of wonderful cities, once the kingdom of a race now lost—a race whose population counted high into the theorem of a race hundreds and may be millions; a race which he thinks reached the height of its proud though primative civilation in the new world perhaps a thousand years before Christ, and which was in existence cortainly more than a thousand years ago. The people have ne name, and may have been forgotten in the traditions of the descendants of their neighbors. Their discoverer is led to believes that their ancertors once flourished in South America. In Brazil, Bolivia or isomewhere in the sources of the Amazan, whence they spread downward to the sources of the Caribbean sea; thence drifted in their cances by the currents of the eastern Atlantic into the guilf, and thus to the keys of Florida.

The first of these approached were doubtless a hundred or more miles out from the maintand. By spreading from one of the keys to another they thus meached the maintand. Thus they admitted a great cultural fidal wave, which appread in time over the greater part of the midsouther; a country, for Mr. Cushing believes that they were the first mound builders. They must have four-temporaneously with the highest glory of the Greeks and the Bomans, They had their temples, their kings, their

or namedles without any favorable re-sult. They sometimes gave temporary relief until the effects of the medicine wore off. I attributed this to my se-dentary habits, being a bookkeeper with little physical exercise, but I am glad to state that the tablets have overcome all these obstacles, for I have gained in flesh, sleep better, and am-better in every way. The above is writ-ten not for notoriety, but is based on actual fact."

Respectfully years.

Respectfully yours.

A. W. SHARPER,
61 Prospect St., Indianapole, Ind.
It is safe to say that Stuart's Dyspepsia Tablets will cure any stomach weakness or disease except cancer of stomach. They cure sour stomach, gas, loss of flesh and appetite, sleeplessness, paipitation, heartburn, constipation and headache.

ONE GREAT DISCOVERY

Follows Another-Read and Keep Posted.

The advance in medical science greater than in any other branch. The discovery of the X rays and the finding of malaria in the blood by analysis are the most recent discoveries. but not the greatest by any means. The discovery of a remedy or medicine that discovery of a remedy or medicine that will instantly bring relief to almost any form of disease we think is beyond conception. A remedy that does not require hours and hours of patience and pain before relief comes has been discovered. Pooh! you say. Would you have believed a few years ago that the telephone is such a great invention as it is? Just so it is with the great discovery of Lightning Hot Drops, a remedy that stands to-day without an equal, without a parallel for the cure of all stomach and howel troubles, caused by over-eating, indigestion, dyspepsia. Relief comes so quickly you will be astonished, and the fact that it leaves no bad vesults is the beauty of it. The action of Lightning Hot Drops is marvious, yet harmless, and you will be surprised to know how many different kinds of allments you will find it good for, and if you once use it you will have no occasion to keep a cupboard full of different kinds of bottles, for Lightning Hot Drops will do the work of plasters, pills, ointments, tonics, etc., and save you lots of money, for it costs only 25c., and the 50c size holds two and one-half times as much as the 25c size, and its sold with the positive understanding that if it gives on relief your druggist will give your money back. Made by Herb Medkeine Co, only, Springfield, Ohlo. will instantly bring relief to almost any

Hopeful Talk About Business. New York Journal of Commerce: The closing quarter of 1896 has developed nditions which warrant very substantial hopes for the new Year. In the very mfldst of the struggle against the silver peril a series of reliefs has been forthcoming of inestimable value. Conjointly from the contraction of our imports the increase of our exports of manufactures and an extraordinary foreign demand for our agricultural products at relatively high prices—the foreign exchanges were turned in our favor during the months of August to November to the extent of considerably over \$100. we find ourselves with at least \$40,000, 000 (possibly more) to our credit abroad at the opening of the year, and after the payment of interest due to Europe, instead of having to face a state of adverse exchange and he prospect of several weeks of efflux of gold—conditions which almost invariably prevail during the first quarter of the year. Simultaneously with this movement the gold balance of the treasury has fisen to \$135,000,000, while the New York banks are holding \$77,000,000 of the yellow metal. This sudden transition is marvelous, and places the country in a condition of monetary resource and of independence of the European centers which has rarely, if ever, been equaled at this season of the year. From all this, it results that, so far as confidence depends upon the position of the treasury, there can be little occasion for misgivings for at least many months to come; and if sound measures are provided for protecting the government against lis demand obligations the treasury may be finally erased from the category of causes of distrust.

Upon the whole, apart from political unsettlements, 187 opens with most encouraging prospects of a revival of business have been sobered too much from the angule of europease and the loss of capital to participate in any hasty born. Until they have recovered from their ill fortunes they will pursue asfe and cautous methods of buying and seiling; and while this year may be one of stead recovery it is not likely done with

is far shead of any blood remedy on the market, for it does so much more. Resides removing impurities, and toning up the run-down system, it cares any blood disease, it matters not how deep-seated or custinate, which other so-called blood remedies fall to reach. It is a real blood remedy for real blood diseases.

Mr. Ass Smith, of Greencastle, Ind. writes: "I had such a had case of Sciatic Rileumatism that I became absolutely helpless—unable to take my foods relaming myself in any way. I took many patent medicines, but they did not reach my trouble. One dosen buttles of S. S. S. cared me sound and well, and I now weigh 170."

relates the Detroit Free Press, "that some of our western colleges are arranging for a sort of battle royal to

ranging for a sort of battle royal to come off annually in the debatting arema. I like that sort of thing. It teaches young men to reason quickly and accurately, while they are on their feet in presence of an audience and to express their ideas intelligently as well as impressively. Great thing: I used to be something of a dehater myself."
"So you were," laughed an old classmate present. "Guess I'll have to tell them about the time we went over to Big Ford to clean out the district school debaters there."
"Never mind, now."
"Too good to keep, Old Tom, there, and I roomed together. We thought ourselves mighty strong on the debate of reashmen. When we heard they were going to discuss the good old question of capital punishment at the Ford, we thought it a golden opportunity to show our paces as well as get needed practice. In order to annithiate the rural orators we prepared ourselves on opposite sides of the question. If was a howing winter night, but we drove ten miles and whetted our with all the way by wrangiling over the battle opened, When I had heard one

but we drove ten miles and whetted our wits all the way by wrangling over the subject for discussion. After we had warmed up at the big box stove the battle opened. When I had heard one or two of those young country fellows roar forth their arguments.nailing their points with gestures that would fell an ox, I revised my former broad estimate of Tom and myself. The flowers of reloric were not scattered profusely, but there was a wonderful amount of meat in what they had to say, I got through my effort all right."
"Oh, of course."
"But poor Tom! He had soared beautifully to the very senith. He was making a peroration worthy of immortality. When he had both hands aloft and was dealing directly with the angel of mercy a fair amazen on the front seat yawned and then gisgled. Tom stopped as though he had been paralyzed. He never started up again. The judges solemnly decided that Tom's side had been knocked galley west, and on the way home he stopped on the top of the bleakest hill to swear me to secrecy."

RAILROADS IN JAPAN.

American Firms Receiving Contracts for Equipment for Their Completion.

Japan is rapidly becoming one of this material, supplies and equipment. Sev eral months ago an order for steel rails was placed with the Illinois Steel Company, of Chicago, and later the order was duplicated, the Carnegie Company was deplicated, the Carnege Company securing the contract. These ralls have only recently been shipped to Japan, and, it is understood, negotiations are now in progress on an order much larger than the two received last year. It is believed the Carnegie Company will secure the work.

In addition to the above orders and the forty-four locomotives, twenty passenger and twenty-four freight, consenger and twenty-four freight, con-

the forty-four locomotives, twenty pais senger and twenty-four freelight, contracted for with the Baldwins, delivery of which must be made this an next month, the Rogers Locomotive Works, at Paterson, New Jersey, have recently received from the Imperia Railway of Japan an order for eighteel locomotives, which are to be used to the lines controlled by the Japanes government. Joseph U. Crawford, engineer of branch lines of the Penn sylvania Railrosd, has been appointed in the country for the Japanese country for the Japanese government. Representatives of the Tayanese government coads.

Representatives of the Japanese rail ways are now inspecting the lars systems of railroads in the Unit States, and it is understood their line will be largely constructed and opera ted under what is termed the Ameri can system. This means, it is believed that further important orders for a kinds of supplies and equipment will be forthcoming as a result of the adoption of this system.

WHAT AN ACCIDENT

Has to Do with the Daily Life of a Wheeling Citizen.

There is something novel in reading incidents connected with the life of people we know. Even if these are of the most trivial nature, the fact of their being bound up with the life of a neighbor makes them interesting. If it is only a readable notice of another man's wees or sorrows, curiosity alone tempts us, when we know there are others on the list to wonder who comes next. The report that follows comes from 1413 Market street, the home of Mrs. Caroline Rits, who some four years aso made a misstep and was precipitated into the cellar. The immediate results of the accident were gotten over when it was noticed that across the foins there was always more or less pain. In speaking about it, Mrs. Ritz says: "I suffered terribly with my kidneys the last two years and nothing did mee any good until I got a box of Doan's Kidney Pills at The Logan Drug Co. They fixed me up in a very short time and I have felt well since. The pain across my loins was of a sharp, darting nature. I could at times scarcely move about, and could not rest at nights. I had frequent attacks of headache and disziness and a heavy, dutl, bearing-down pain in the bladder. The secretions of the kidneys were frequent, yet scanty and I felt generally out of sorts. From my experience with Doan's Kidney Pills I advise anyone having the slightest indication of kidney trouble to me them and reap the benefit of that time-honored expression: 'A stitch in time saves unne.'"

Doan's Kidney Pills are for sale by all dealers, price 50 cents per box. For sale by all dealers, Foster-Milburn Co., Buffalo, N. Y., sole agents for the United States.
